

DIAMOND RING

CHRISTOPHER BOOTS

DIAMOND RING

An extension of Christopher's interest in all things geological. All design starts as a vision, daydream or feeling, and so it is with Diamond Ring. Naturally occurring quartz crystals appear to have grown and lit themselves from the inside, illustrating his exploring nature as pure as possible. Silicon Dioxide (SiO_2) is one of the most abundant materials in the earth's crust, but as a crystal form, rare.

MATERIALS

Quartz Crystal, Iron, Polymer, Gallium

FINISHES*

Clear or smoky quartz crystal

DIMENSIONS†

Available from Ø 450 to Ø 2100 mm

WEIGHT

Starts at 10 kg

LAMPING†

2500K–2700 K LED

DIMMING†

0-10 V
