

CHRISTOPHER BOOTS

INDUSTRIAL DESIGNER VACANCY

The Industrial Designer is responsible for research, design & development of new & existing products, along with custom & commissioned lighting projects.

This is a collaborative role, requiring a solutions-focussed aptitude, exceptional analytical, communication & design skills, a natural eye for the development of beautiful form, a deep interest in manufacturing, a love of materials, with a knack for understanding people.

Applicants with these skills and experience should apply:

- Tertiary qualification in Industrial Design, Interior Architecture or Architecture, minimum of 4 years experience in product development from concept to completion
- High level organisational skills, working to timelines, living for details & documentation, lateral thinking, operational procedures
- Advanced level of competency with SolidWorks, SketchUp, Adobe Creative Suite, versatility in Mac & Windows
- Excellent written & oral communication skills, strong ability to communicate with a diverse range of people
- Knowledge of various material fabrication techniques including metal, stone, glass & plastics
- Proficiency in detailed technical & architectural drawings to exacting standards, budget management, project management, conceptual development, sketching, model making & renders
- Demonstrated ability to work independently & part of a team, a positive attitude, great work ethic and growth orientated
- Excellent aesthetic sensibility

In essence, we are looking for an individual who lives and breathes design, and laterally applies design thinking.

Full Time. Commencement: November 2020.
