

# PROMETHEUS X

THE TITAN PROMETHEUS. CREATOR OF HUMANITY. STOLEN FROM HEAVEN. THE SACRED FIRE.

LIMITED EDITION OF 10 + 1AP

To coincide with the studio's 10th anniversary milestone Christopher Boots carries the remnants of the past into the future through the evolution of one of our first and most seminal designs PROMETHEUS.

Through the marriage of cast bronze and the enduring gravitas of crystal quartz, PROMETHEUS X intertwines the three foundational pillars of the studio - narrative, material exploration and geological majesty.

Within the shades of PROMETHEUS X's irregular bronze surface lies an elemental quality that is innately natural. The character of the crystal quartz harbours an ancient, unbreakable connection to earth eschewing time and dispelling any notion of trend. Scored into its surface is the narrative of the eponymous god, a homage through both design and materiality - Prometheus.

PROMETHEUS X was created to mark the 10 years since the studio was founded on 11.11.11

The limited edition of 10 pieces are a new take, using old processes, reimagining a signature piece for Christopher Boots; the PROMETHEUS.

Each one of a kind piece is created, starting with it's own unique wax mould, hand crafted by artisans. Textures and markings are worked in to the wax, using various tools and minerals, to tell a story of time and reflect the natural patterns found in nature. Once aged, each piece is stamped with the 3 marks symbolic to the studio; The Maker's mark, the Foundation mark and the Craft Mark.

Working alongside a notable local bronze foundry, the wax moulds are processed through the method of "lost-wax casting".

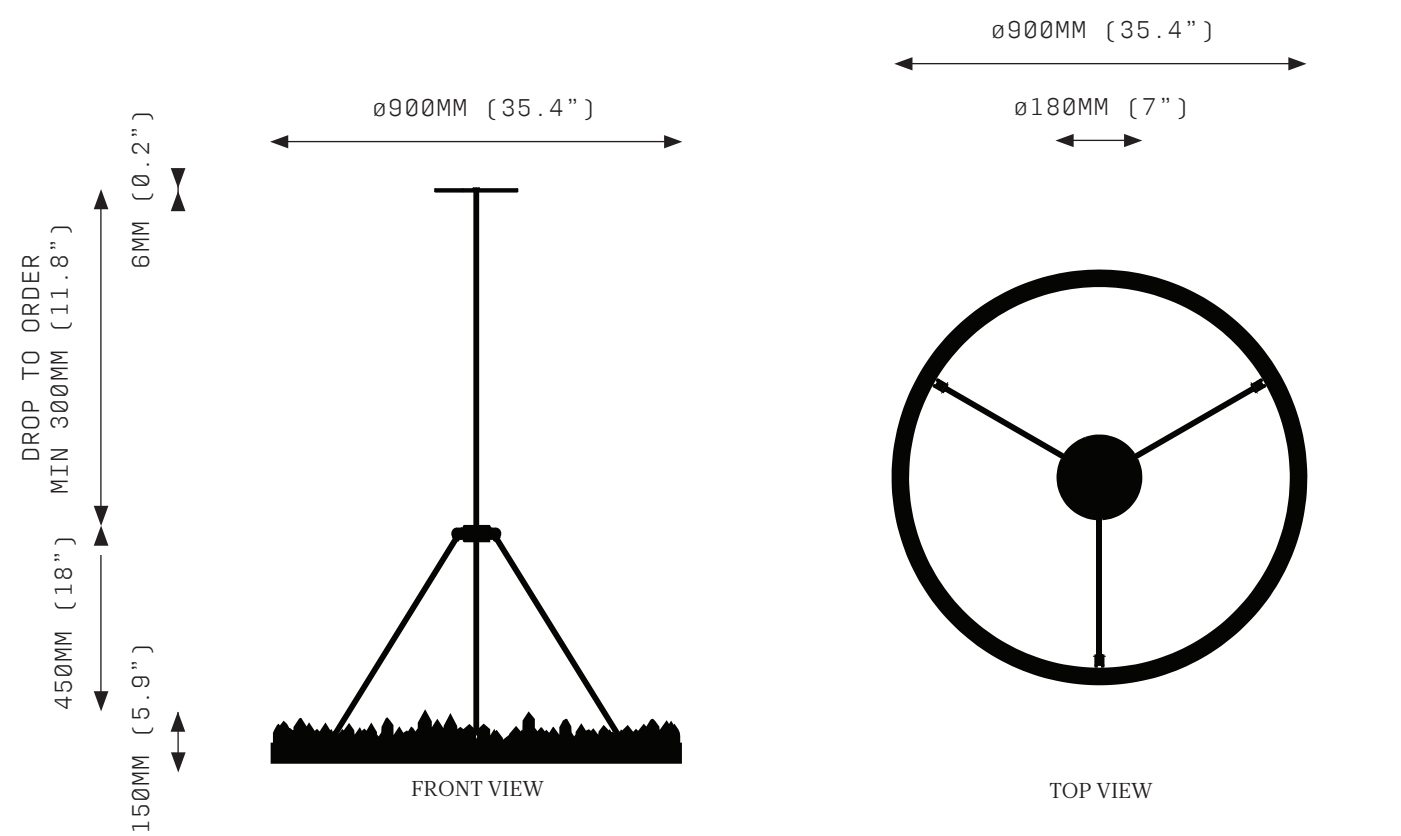

The luminaire also features a one of a kind canopy to complete the piece. Stamped on the surface is the unique edition number and greek text that dresses the perimeter, telling the story of the Ancient Greek god of fire.

THE TITAN PROMETHEUS. CREATOR OF HUMANITY. STOLEN FROM HEAVEN. THE SACRED FIRE.

The PROMETHEUS X embraces a raw finish, lightly buffed and sealed with wax, allowing it to patinate naturally through time and the elements, whilst the suspension components are treated with a dark patina, so they may recede to showcase the cast bronze. Finally to complete the PROMETHEUS X are the signature raw quartz crystals, increased in size to compliment the scale of the frame on which they adorn.
